

Creating Boards with Github Instructions Sheet

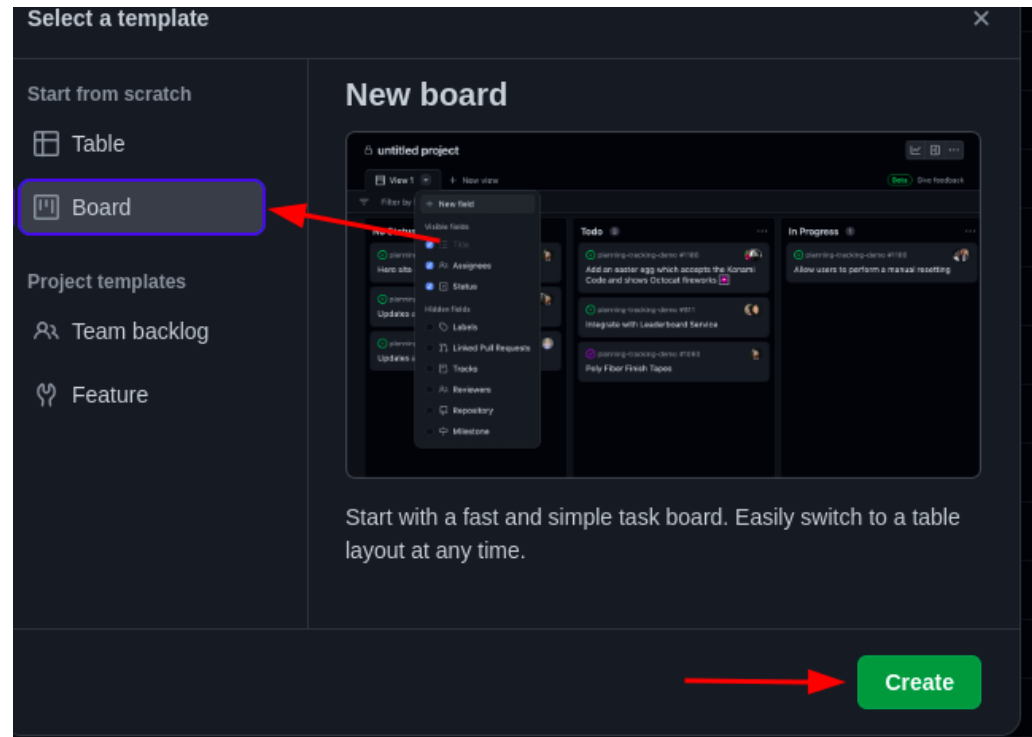

Getting Set up

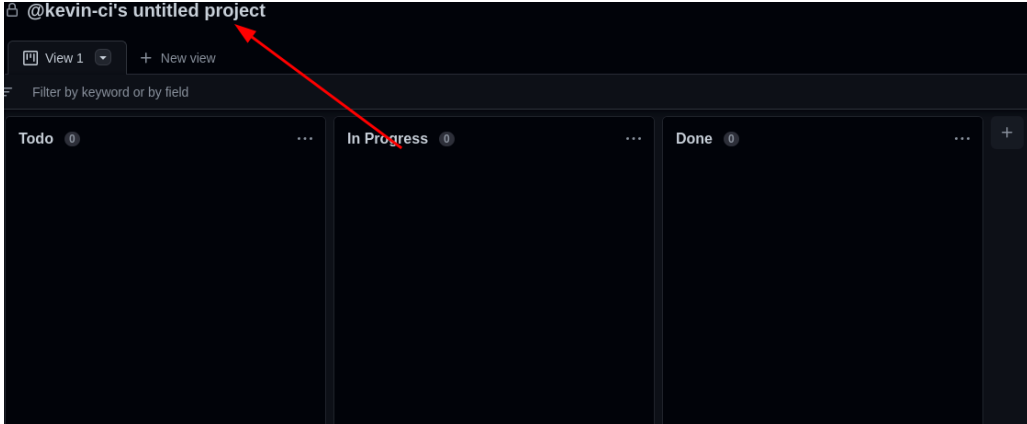

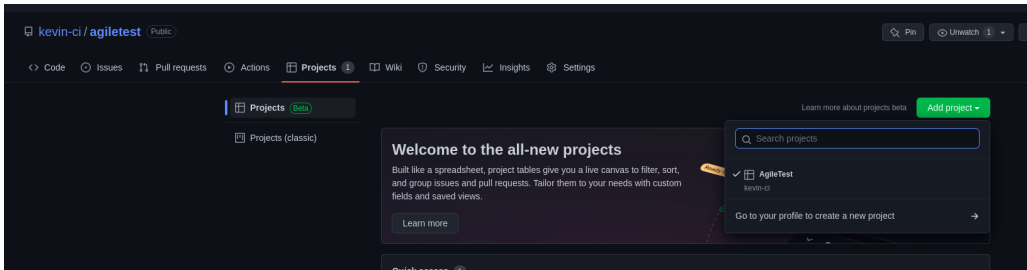

In Github:

#	Step	Code	Your Notes
1	Go to the Projects tab in your repo.		
2	Click Add Project , then Go to your profile to create a new project.		 A screenshot of the GitHub Projects interface. The header shows 'Projects (Beta)' and 'Add project'. Below the header, there's a 'Welcome to the all-new projects' message. A red arrow points from the 'Add project' button to a search bar labeled 'Search projects'. Below the search bar, there's a list of projects, including 'AgileTest' by 'kevin-ci'. At the bottom, there's a button that says 'Go to your profile to create a new project' with a right arrow.

3

Create a new Project using the **Board** template.

4	Rename the new board by clicking the name in the top left.		 A screenshot of a GitHub project board. At the top left, the title "@kevin-ci's untitled project" is displayed. A red arrow points to this title. Below the title, there are tabs for "View 1" and "+ New view". A search bar says "Filter by keyword or by field". The board has three columns: "Todo", "In Progress", and "Done". Each column has a plus icon to its right.
5	Navigate to the Projects tab again in your repo. Click Add Project again, and search for your new board to add it.		 A screenshot of the GitHub repository page for "kevin-ci/agiletest". The "Projects" tab is selected in the top navigation bar. On the left, there are buttons for "Projects" and "Projects (classic)". A "Welcome to the all-new projects" message is in the center. On the right, there is a search box labeled "Search projects" with a dropdown menu showing "AgileTest" as a result. A green "Add project" button is in the top right corner.
